

Accounting, Audit and Management Information Systems Master Program

The master program is a **two-year full-time program ideal for students who are looking for roles in large accounting firms**, other companies and/or for an international career in field of accounting, audit or management information systems. The minimum number of credits (ECTS) is 120.

The program develops advanced skills in the field of accounting (financial and integrated reporting, auditing, management accounting, taxation) and management information systems, preparing students for high level positions in audit and accounting firms, large companies, including multinationals. We proudly state that visiting professors and practitioners are invited to deliver presentations and lectures/courses.

Partnerships: University of Amsterdam (Netherlands), Romanian Authority for Public Oversight of Statutory Audit Activity (ASPAAS), The Romanian Chamber of Certified and Chartered Accountants (CECCAR).
